1. INTRODUCTION

The Future Fund Board of Guardians (the Board) and the Future Fund Management Agency (the Agency), are subject to the Freedom of Information Act 1982 (FoI Act).

Established by the Future Fund Act 2006 the Board is responsible for investing the assets of the Future Fund and the three Nation-building Funds (Building Australia Fund, Education Investment Fund, Health and Hospitals Fund). The Agency is responsible for supporting and advising the Board in its functions.

2. PURPOSE AND OBJECTIVES

The purpose of this Plan is to assist the Board and Agency in planning and developing its contribution to the Information Publication Scheme (IPS). The Plan describes how the Board and Agency will implement the IPS in respect of their information holdings.

The Plan is designed to show what information the Board and Agency intend to publish, how and to whom it will be published and how the Board and Agency will comply with the IPS requirements. Through its publication the Plan will also help facilitate public awareness and consultation on the approach taken to meeting the IPS requirements.

The Plan outlines the mechanisms and procedures by which the Board and Agency will:

- manage their IPS information holdings
- Identify and publish all information required to be published
- identify and publish optional information for publication
- review on a regular basis that information published under the IPS is accurate, up to date and complete
- ensure information is easily discoverable, understandable, machine-readable re-useable and transformable
- ensure satisfactory compliance with Web Content Accessibility Guidelines 2.0 (WCAG 2.0)
- gather and, where appropriate, incorporate feedback on the Board and Agency's approach to its IPS contribution

3. ESTABLISHING AND ADMINISTERING THE BOARD AND AGENCY'S IPS CONTRIBUTION

Identifying and responding to the requirements of the IPS is the responsibility of the Agency's Head of Public Affairs working alongside the Agency's General Counsel and with input from the Agency's IT team and external service providers. The Agency's General Manager and executive team have been engaged as appropriate, along with other relevant internal stakeholders.

To identify and respond to the IPS requirements, the Agency has:

- reviewed the FoI Act

- reviewed guidelines, factsheets and other materials produced by the Office of the Australian Information Commissioner
- attended seminars organised by the Office of the Australian Information Commissioner and the Australian Government Solicitor

To identify information required or permitted to be published, the Agency has:

- reviewed material currently published on the Board and Agency's website
- assessed how the material currently published meets the IPS requirements and identified gaps in the information required to be published
- assessed whether material available on the website and through the annual report is up to date
- reviewed the extent to which material available on the website meets the requirements of WCAG 2.0

4. ADMINISTERING INFORMATION PUBLISHED UNDER THE IPS

Responsibility for maintaining material published under the IPS lies with the Head of Public Affairs, who will maintain ongoing overview of the material published under the IPS with a view to ensuring it remains accurate, complete and up to date.

As part of this work, a register of information required or permitted to be published under the IPS and a disclosure log for the purposes of s 11C of the FoI Act have been developed.

The organisation's Chief Executive Instruction on records management provides a framework for information asset management and records management that is consistent with the IPS requirements. A project to further refine the organisation's approach to archiving is currently being initiated and relevant policies and procedures concerning the IPS will be considered as part of this.

A structured review of the material published and its compliance with the requirements of the IPS will be undertaken on an annual basis. This will include consideration of feedback received from members of the public through the feedback email available on the website, review of visitor patterns to the website and review of any general topics and areas of interest that members of the public have raised with the Board and Agency and of requests for information that are routinely granted.

Where significant new material is added to the website, a note to that effect will be placed on the home page. Visitors are also able to the website to receive news alerts.
