Future Fund rejects claim by Australian Super

The Future Fund notes that Australian Super has chosen to initiate a proceeding against the Future Fund in relation to the Future Fund's acquisition of a shareholding in Perth airport from Australian Infrastructure Fund (AIX).

The Future Fund is confident in its position and will vigorously defend this case.

By making an offer of \$2 billion to acquire AIX's assets and in the end securing around half of the total, this transaction unlocked value for AIX shareholders and the many other investors in the assets, which included a range of airport assets across Australia and internationally.

The Future Fund has consistently and strongly maintained that it has acted appropriately at all times.

The Future Fund remains focused on contributing to the growth of the assets acquired through the transaction with AIX and to further developing its broader portfolio.
